SPE 2814

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims is the inclusion of the feature of a method of oxidizing, in a semiconductor processing chamber, a first feature while leaving a second feature substantially unoxidized, the method comprising subjecting the first and second features to O₂ and H₂ in an explosive reaction in the semiconductor processing chamber, such that the reaction between the O₂ and H₂ does not increase the pressure in the processing chamber beyond a predetermined safe level, which is not anticipated nor rendered obvious over the prior art of record. The applicant has defined the explosive reaction to be a reaction where the partial pressure of hydrogen is over 4%, which has been defined as the explosion limit by Nakajima et al. (U. S. Pat. 5,907,188). Furthermore, applicant has furnished evidence as to how the explosive reaction of the hydrogen containing gas and the oxygen containing gas differentiates from the prior art of record as shown in Affidavits filed on 7/25/02 and 10/23/03.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the application has been allowed and formal drawings are required.

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
